

Surfaces – new insights from new analytical techniques

Learn more about new techniques for your innovation

The dynamic of Surface Science research approaches is changing. This workshop focusses on innovative techniques to understand the material applications and properties of surfaces to support you to better understand your applications.

Who should attend:

Senior scientists and Managers/Directors of R&D and Analytical Departments

Program:

- 15:30 Welcome and Introduction (R. Dümpelmann)
- 15:40 Innovative surface analytics and its application:
XPS and ToF-SIMS (A. Schäfer, NanoAnalytics)
- 16:20 Explore new analytical methods with Inolytix:
iGC Inverse Gas Chromatography
(R. Dümpelmann, Inolytix AG)
- 17:00 Snacks and networking

Date:

27 November 2014

Time:

15:30 – 17:00

Plus snacks and networking

Location:

Bistro Casino
Industriepark C785
Frankfurt Höchst
